Mon, 18 Jun 2018 06:38:00 GMT - The frost line" also known as frost depth or freezing depth" is most commonly the depth to which the groundwater in soil is expected to freeze. The frost depth depends on the climatic conditions of an area, the heat transfer properties of the soil and adjacent materials, and on nearby heat sources. For example, snow cover and asphalt insulate the ground and homes can heat the ground (see ...
